

Illustrative Scheme for CE Marking

The 13 steps to accomplish
and verify the exactness of
CE Marking

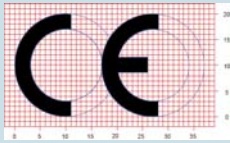

Passages to accomplish CE Marking

Responsible party: builder, producer, importer

Activity		Stage where it is preferable to carry out the activity *
1	Research and study of the standards referred to the product to be made	Pre-project
2	Risk Analysis	Project
3	Manual of installation, use and maintenance	After the validation of the prototype and before production
4	Declaration of conformity	Before sale (it accompanies the product)
5	Application of the CE mark	At the end of production, after the positive testing of the product
6	Preparation of production control procedures	Present in the company before the pre-design

Passages to verify the formal correctness for the CE Marking

Responsible party: supervising authority, client

	Activity	Stage where it is preferable to carry out the activity *
1	Checking the presence of the mark	As soon as the product is available, before purchase
2	Verification of the correctness of the mark	After having identified it
3	Checking of the presence of the Declaration of conformity	After having noted the correctness of the mark
4	Verification of the correctness of the Declaration of conformity	Must be signed by subject with VAT
5	Checking of the presence of the manual of installation, use and maintenance	It must be same as to the Mark and Declaration
6	Verification of correctness of the manual	Must contain specific sections dedicated to Safety
7	<p>Checking of availability of the technical file.</p> <p>Components of the technical file:</p> <ol style="list-style-type: none"> 1. Copy of the label with CE mark 2. Copy of the manual 3. Copy of the declaration of conformity 4. Risk analysis 5. Project documentation (calculations, reports, wiring diagrams) 6. Checking procedures 	<p>Only for the supervising authorities</p> <p>Note: the file might not be available immediately; therefore there could be a waiting period of 15 / 30 days.</p> <p>Correct copy of the CE MARK:</p>
